

EDUCATION

Master of Science in Aerospace Engineering (May 2027)
Master of Business Administration (May 2027)
Bachelor of Science in Aerospace Engineering (May 2026)
The University of Alabama, Tuscaloosa, AL
UA GPA 3.89/4.00

SKILLS

- MATLAB, Simulink, Python
- SolidWorks, Ansys, ArduPilot, FreeFlyer
- Circuit Board Design, Soldering
- Additive Manufacturing
- Lathe, Mill, Drill Press, Band Saw
- Systems Integration & Project Management
- Excel (Solver, Pivot Tables, Monte Carlo)

NOTABLE COURSEWORK

AEM 428 Space Propulsion (in progress)
AEM 520 Computational Fluid Dynamics (in progress)
AEM 468 Flight Dynamics & Controls (completed)
AEM 582 Space Systems (completed)
AEM 513 Compressible Flow (completed)
ST 560 Statistical Methods (completed)
OM 500 Mgt Science & Spreadsheet Modeling (completed)

RELEVANT EXPERIENCE

UA Space

September 2023 - Present

Payload Team Lead – BAMA-2 CubeSat

- Lead a team of 8 in the design, manufacturing, testing, and integration of our CubeSat's drag-sail payload
- Improved system reliability from ~80% to >95% through mechanical redesign and iterative testing
- Designed prototype satellite components using SolidWorks, KiCAD, and additive manufacturing techniques
- Applied NASA systems-engineering processes while coordinating payload integration with other subsystem teams
- Coordinated with external vendors for anodizing and conformal coating of flight hardware

Vertical Flight Society DBVF Competition

August 2025 - Present

Control Systems Lead

- Design and integrate the UAV avionics stack (Cube Orange flight computer, Raspberry Pi 5, GNSS, camera, sensors), selecting and purchasing electronics and defining subsystem hardware architecture
- Develop autonomous flight and payload pickup capability using Mission Planner and Python-based AprilTag vision processing on a Raspberry Pi
- Validate system performance through SITL and HITL testing prior to flight
- Define control-system requirements, coordinate interfaces with structure, electrical, and payload teams

Missile Defense Agency - MBA Consulting Project

August 2025 - Present

Team Lead

- Lead a 7-member team in structured creation and evaluation of advanced missile-defense concepts in collaboration with MDA representatives
- Apply Technology Readiness Level (TRL) assessment and risk analysis to evaluate feasibility, development pathway, and strategic impact

European Innovation Academy in Porto, Portugal

July 2025 – August 2025

Co-Founder, MisFits CTO

- Directed problem validation through structured market research and customer analysis
- Built Monte Carlo models in Excel to evaluate inventory turnover, match rates, and financial feasibility
- Developed IP and funding strategy with VC mentors; built scalable financial and operational model

WORK EXPERIENCE

Culverhouse College of Business

September 2025 – Present

Virtual Study Abroad TA Coordinator

- Lead a team of 7 TAs to facilitate participation of students in Zoom meetings with business experts from India
- Use Excel expertise from OM 500 course to manage, schedule, and track performance of TAs

Legacy Acquisitions, Plano, Texas

June 2024 – August 2024

Account Manager, Brand Ambassador

- Promoted to Account Manager and ranked in the top 50 AT&T sales reps nationwide for two straight weeks
- Mentored new trainees on the sale process, handling rebuttals, and closing sales while providing ongoing support
